About NLP

What is Neuro Linguistic Programming (NLP)?

NLP is the art and science of personal excellence, derived from studying how top people in different fields obtain their outstanding results. NLP's core idea is that an individual's thoughts, gestures and words interact to create one's perception of the world (called maps of reality). By changing one's outlook, therefore, a person can change his attitudes and actions, hence, the results.

In short, NLP provides us with a way of understanding not only ourselves, but other people too, and learning to communicate with them in the most appropriate and effective way possible. It is about training your mind to experience the wonders, not focus on the problems. It's about learning to let go of things which have held us back, and live the life we want to live, however that may be. It's about getting our outcomes... it's not a theory, it's about finding out what works....and achieving the results!

If what you're doing isn't working, do something different

NLP is widely used in marketing and communications, sales, leadership, coaching, negotiating and team building. It is a powerful way of enabling you to reach your full potential as a leader. You can expect to increase productivity and revenues and create greater satisfaction from your employees and customers.

What will I learn from the programme?

Communication is the response you get. The Answer lies in the Question. Each person is Unique. We have all the resources we need. Having Choice is better than no choice. Problems cannot be Solved unless you have an outcome. People make the Best Choice available to them at the time they make it.

How will it help me?

Business to promote good communication and negotiation strategies including sales and management skills.

Counseling, coaching and therapy to accelerate changes with clients by looking at the processes that underlie a particular pattern, emotion or habit.

Education and training to promote and accelerate learning and memory. NLP is also a valuable tool when it comes to training and teaching design methods.

Personal development to remove negative emotions and patterns; promote confidence and self esteem. NLP also has tremendous applications in goal setting.

Parenting, learning how to foster good, clear communication with your children right from the start.

Sport to enhance performance, develop and maintain the winning attitude.

EYE ON IT How Does NLP Training Work?

NLP training is a combination of group learning, individual experiential exploration and personal application. In the training group, you will see live demonstrations of NLP techniques and be able to ask questions and understand the principles that underpin the techniques. Then you will work in pairs or small groups to explore the techniques further to find what works in what context. Finally, you will be able to apply the techniques to your own business and personal life and test out the results for yourself.

It is important to have an open mind because sometimes what you think will work doesn't and what you think can't possibly work, works easily.
